Name	Mr. MANOJ SINGH BISHT	Sample Collected On:	08/11/2025 13:00:55
Gender/ Age	Male 49 Yrs	Sample Received On:	08/11/2025 13:00:56
Lab No.	102547695 Permanent Id :	Reporting Date &Time On:	10/11/2025 15:24:22
Ref. By :	Dr B K TRIPATHI	Panel :	

Test Name	Value	Unit	Biological Ref Interval
	Serology		
Anti Cyclic Citrullinated Peptide IgG Antibodies, Serum CLIA	<8.0	U/L	0 - 15
Anti Nuclear Antibodies, Serum **Immunofloresence**			
Titre	1:80		
Result	Positive		Negative
Pattern	+		
Immunofloresence Intensity	NUCLEAR		

ANA by IIF using HEp 2000 (Immunoconcepts, USA). HEp 2000 uses a genetically modified HEp 2 cell line with increased sensitivity for Anti SSA (Ro) which is missed on the conventional HEp 2 cells, without affecting the other IIF patterns.

Pattern	Type of Antibody / Antigenic determinants	Disease Associations
Homogenous	dsDNA, Nucleosomes (Chromatin), Histones	SLE, Drug Induced LE, other Rheumatic diseases
Speckled	Sm, U1-RNP, SSA(Ro), SSB(La), Scl-70	SLE, Sjögren's Syndrome, MCTD, Evolving Rheumatic disease, Scleroderma
SSA	SSA	Sjogren's Syndrome, SLE, Neonatal Lupus
Nucleolar	Fibrillarin, Pm-Scl, RNA Polymerase, NOR90, Th-To	Scleroderma, Scleroderma/Myositis
Centromere	CENP A, B, C	CREST form of Scleroderma
Nuclear Dots	Sp-100, MND, NSp-I	Primary Biliary Cirrhosis
PCNA	PCNA	SLE
Nuclear Membrane	Nuclear Lamins	Lupoid Hepatitis, SLE, RA
Cytoplasmic	Mitochondria,Actin,Vimentin,GolgiAppratus,Jo-1,	Autoimmune Hepatitis,Myositis,PBC, S

Note: ANA is reported in low titres in a significant proportion of healthy population and results neec

correlated clinically. Autoantibodies may not always correlate with the observed pattern and confirmatory tests for positive results are recommended where available. ANA results should only be interpreted by the clinician in light of patient's clinical information. An ANA profile is suggested for ANA positive patients.
